

UNITED STATES 2022

Luminate Year-End Music Report

LUMINATE

Introduction

In early 2022, we reintroduced ourselves to the world as Luminate. Embodying this new brand identity best reflects our values for objectivity and transparency, and it also aligns with our mission to continue our role as the authoritative and most trusted source for entertainment data in this ever-evolving creative economy.

As we round out our first calendar year with that in mind, we are pleased to present our **2022 Year-End Music Report**, which provides an in-depth look at consumption trends and audience research insights with our unique expertise. As boundaries continue to be pushed both by artists and industry professionals, so has the scope of our analysis, bridging together music's expanding role as it pertains to other areas like film, TV, gaming, finance, Web3, social media and elsewhere.

Included in this report, you'll see six trend areas we identified as worth further exploration from this past year from multiple angles, and especially as they relate to future business planning. We are also pleased to present year-end Charts from our partners at Billboard, fueled by our data, to close out this year's report.

The Consumption Renaissance

While streaming continued to grow in 2022, with U.S. on-demand audio streams hitting the trillion mark for the first time ever in a single year in late November, that is only part of the year's music consumption story. Looking at the landscape over the past year, specifically how different artists across different genres

engaged with audiences to launch successful album campaigns, there's a bigger picture to take into account when it comes to consumption methods.

The year saw new albums from Taylor Swift, Beyoncé and Bad Bunny earn No. 1 positions on the Billboard 200 upon their debuts, but each artist achieved the No.1 spot through a different mix of consumption means. While Bad Bunny did it with 100% digital offerings (streaming and digital albums) for his album *Un Verano Sin Ti*, only 55% of the first-week consumption numbers for Beyoncé's *Renaissance* were digital and only 38% the first-week consumption numbers for Taylor Swift's *Midnights* were digital. Notably, Swift's physical product offerings made up 62% through multiple vinyl and CD offerings for fans, and *Midnights* sold 575K vinyl products in its first week, breaking a record previously set by Harry Styles in May. Swift also achieved 1.58 million equivalent albums upon the first seven days of release, marking it the biggest release week in seven years.

Fanalytics

In Luminate's Fall 2022 Music 360 Research Report, we introduced the U.S. Music Listeners Market Segmentation. It is a first of its kind for this audience, acting as an analytical tool that groups like-minded consumers into distinct groups and enables us to gain richer insights into each group's behaviors, thoughts, and opinions. We've identified five different types of music listeners in the U.S. based on broad behaviors and attitudes, and they are as follows: The Enthusiast, The Devotee, The Radio Rocker, The Cool Kid, and The Ghost Listener.

In the following report, we share some insights into how these five types of music listeners behave, and how they engage with some of 2022's most popular album releases. For example, The Enthusiast, who is more likely to be male and Gen X, listened to Beyoncé's new album as much as they listened to Taylor Swift's new album this year.

Gen Z, Music, and Money

As Gen Z becomes more and more powerful, influencing the market with their consumption habits, all eyes were on their behaviors this past year. According to Luminate's Fall 2022 Music 360 Research Report, Gen Z music listeners in the U.S. spend +21% more time weekly with music than listeners from any other generation. Much of that time is spent discovering music on streaming services like Spotify, Apple, and YouTube and on short-form video platforms and apps like TikTok. In fact, Gen Z is more likely to discover music on both sources than the average listener by 13% and 19%, respectively.

Gen Z's consumption behaviors are only just a part of their story. They are also willing to spend money to support their favorite artists, especially when it comes to merch as they expressed a desire for their favorite artists to offer more merch as an opportunity to show support by +30% more than the average music listener in the U.S. And overall, they spend +18% more money on music monthly than the average U.S. music listener, fueling sales for vinyl record-breaking weeks by Harry Styles and Taylor Swift this year.

In the following report, we dive deeper into Gen Z's other music-related behaviors, what causes are important to them, and what their favorite genres are.

From Sync on Screen to Growth in Streams

The Kate Bush – *Stranger Things* story earned major headlines this past summer, when streams for Bush's music grew by over 20,000% after her song "Running Up That Hill (A Deal With God)" appeared in an episode of the Netflix series. But that's just a very notable example of a building trend in the discovery or re-discovery of music on streaming platforms.

Other scripted shows like *Euphoria* have contributed to major consumption increases to music from newer artists, while catalog artists saw increases from creative on-screen partnerships. For example, when *Elton John Live: Farewell From Dodger Stadium* streamed on Disney+, during the tracking week ending November 24, 2022, Elton John's music showed significant week-over-week gains in his primary artist streaming catalog and radio airplay in the U.S. In fact, on-demand streams (audio and video combined) for his *Diamonds* album were up 15% during that week, while his physical album sales were up 160%.

In the following report, we unpack how 2022 unveiled the power of the right on-screen syncs and partnerships.

Sweet Caroline, Sweet Catalog Sale! Unpacking The Valuation Behind Those Big-Figure Music Deals

The multi-million dollar sales of high-profile catalogs continued to make the news in 2022, with contemporary pop stars like Justin Timberlake, and music legends like Phil Collins and Neil Diamond earning high figures for their repertoires. But what do financial analysts look at to determine the value of that music?

In the following report, we take a look at how interest rates, streaming performance, and more, affect those price tags, and how the marketplace can change accordingly.

Global Outlook

This past year saw music's continued global growth, with worldwide overall streaming consumption growing by 25.6% over 2021. And while we know that Coldplay's "Hymn for the Weekend" had the most total combined audio and video streams globally in 2022, was that a hit song in the most countries? In this report we are pleased to introduce Luminate's new Global Hit Score, which highlights songs which have achieved top popularity on a multi-country level. Read on to check out the top-scoring global songs of 2022, along with an explanation of our methodology.

Fanalytics

LUMINATE MUSIC FANALYTICS

In the first of its kind, Luminate introduces Music Fanalytics, a segmentation of the U.S. Music Listener Market. The entire U.S music-listening market is broadly divided into five key segments and each of them represents unique groups of music listeners:

The Enthusiast

The Devotee

The Radio
Rocker

The Cool Kid

The Ghost
Listener

Meet The Enthusiast

Compared with Listeners in Other Segments
the Enthusiast is more likely to ...

10%

The Enthusiast
represents
10% of music
listeners

Be male
Belong to Gen X
Be higher income, \$75,000+
Spend more money on music monthly*
Be planning to attend live music this year*
Engage with video music content, physical music* monthly
Pay for music streaming (audio/video)
Engage with sports* , play video games* , & engage in esports

Meet The Devotee

Compared with Listeners in Other Segments
the Devotee is more likely to ...

Be male*

Belong to Gen X*

Be LGBTQ+

Spend the **most time with music** weekly

Engage with **video music content, physical music*** monthly

Stream music for free (audio/video)

Listen to **24 of 25 top genres**

Attend **live events, watch movies, listen to podcasts,**
& use **short vid clips***

8%

The Devotee
represents
8% of music
listeners

Meet The Radio Rocker

Compared with Listeners in Other Segments
the Radio Rocker is more likely to ...

Be female*

Belong to the **Boomer** or **Silent** generations

Be **Caucasian/White**

Live in the **Midwest***

Listen to **AM/FM radio**

Cook food for leisure & **watch television***

Stream music only for free (audio/video)

28%

The Radio Rocker
represents
28% of music
listeners

Meet The Cool Kid

Compared with Listeners in Other Segments
the Cool Kid is more likely to ...

Be female*

Belong to **Gen Z** or **Millennials**

Live in the **South**

Be **African American/Black**

Listen to **Hip-Hop/Rap, R&B** monthly

Stream music for free (audio/video)

Use **Snapchat** monthly*

27%

The Cool Kid
represents
27% of music
listeners

Meet The Ghost Listener

Compared with Listeners in Other Segments the Ghost Listener is more likely to ...

Be less demographically differentiated

Speak **more than one language** (in addition to English)

Not plan to attend live music in the coming year*

Stream music only via **premium services**

Have **less defined & engaged patterns** in music listening behaviors

27%

The Ghost Listener represents 27% of music listeners

FANALYTICS BEHAVIORS

Each Luminate Music Fanalytics group / segment tends to have unique listening characteristics and behaviors that are specific to them. Here is a brief summary of those behaviors — along with a handful of songs that these superfans might enjoy.

While **Enthusiasts** tend to listen to a wide variety of genres, they are significantly more likely to listen to “classic” genres like Americana, Holiday and Jazz music. While these genres aren’t

their favorite / top genres, listen carefully to these songs / artists that demonstrate how these sub-preferences influence Enthusiasts’ finer music behaviors:

- BoyWithUke, “Two Moons”
- MUNA, “Silk Chiffon” (feat. Phoebe Bridgers)
- Breland, “Praise the Lord”
- MIKA, “Lollipop”
- Nessa Barrett, “La di die”

| Breland

| BoyWithUke

| Nessa Barrett

Devotees, like the Enthusiasts, also listen to a number of genres, while still having unique interests that set them apart. Devotees tend to be at the forefront of “what’s next” — tuning into emerging genres like Afropop, EDM &

World Music at significantly higher rates. See how these preferences translate into songs and artists they listen to (Björk’s inclusion is broadly indicative of their avant-garde preferences):

- Rosalía, “Despechá”
- Fireboy DML, “All Of Us (Ashawo)”
- Disclosure, “Omen” (feat. Sam Smith)
- Björk, “Human Behaviour”
- Amaarae, “SAD GIRLS LUV MONEY (remix)” (feat. Moliy)

| Björk

| Fireboy DML

Pistol Annies

Bruce Springsteen

Radio Rockers enjoy Classic Rock, Country and other genres that established themselves decades ago — but that doesn't mean they're averse to new releases. We've found that Radio Rockers still tune in to

new artists, so long as they embody the same Classic Rock ethos (with modern Country / Rock / Pop fusion acts being an example, which they tend to gravitate towards):

- Bruce Springsteen, "Born to Run"
- Guns 'n Roses, "Welcome to the Jungle"
- Little Big Town, "Boondocks"
- Foreigner, "Urgent"
- Pistol Annies, "Hell on Heels"

Ghost Listeners – by nature of being under the radar – tend to listen to fewer genres (and at lower rates) than other audience segments. That said, they tend to listen to K-pop, Latin and other World genres at

similar rates to listeners overall. These trends are evident when we asked these listeners which artists they like. A few examples of songs / artists that Ghost Listeners might enjoy include:

- LE SSERAFIM, "Fearless"
- Rauw Alejandro, "Todo de Ti"
- Galantis & JVKE, "Dandelion"
- Mark Tuan, "Last Breath"
- Kygo & Whitney Houston, "Higher Love"

Galantis

Kygo

Nirvana

Doja Cat

The Cool Kids are responsible for many of the top-charting artists of the last decade, as they were more likely to adopt streaming services and other digital tech that influenced top hits from the last decade. They're much

more engaged with Hip-Hop and R&B than any other audience, but will still tune into other artists or genres as long as it strikes the same chords:

- Kendrick Lamar, "m.A.A.d city"
- Doja Cat, "Say So"
- Summer Walker, "Playing Games" (feat. Bryson Tiller)
- Future, "Life Is Good" (feat. Drake)
- Nirvana, "Smells Like Teen Spirit"

TREND 3

Gen Z, Music, and Money

GEN Z MUSIC BEHAVIORS & PREFERENCES*

+19%

More time with music weekly

+10%

More money on music monthly

+31% of Gen Z wish artists provided more merch options so they can show their support

Gen Z is More Likely to Discover Music Via:

+61%

Short Video Clips on Social Video Websites / Apps

+30%

Video / Audio Music Streaming Services

+25%

Social Media Websites / Apps

Gen Z Is More Likely To Use These Social Networks In A Typical Month

+105%

+67%

+37%

Compared to the general population, Gen Z is more interested in playing video games (+35%) and watching short-form video (+26%). On the other hand, Gen Z is less interested in listening to the radio (-21%).

Causes Gen Z Cares Most About

1

Mental Health

2

Animal Welfare

3

Homelessness/
Poverty

4

Climate Change

5

Racial Justice

WEB3 / GAMING

59%

of Gen Z aware of the Metaverse are interested in it

+42%

Gen Z is +42% more likely to be gamers compared to the general population

Gen Z is +30% more interested in Memes as NFTs when compared to the total NFT interested population

Nearly 90% of Gen Z gamers use a gaming console

+50%

Gen Z gamers are more likely to use a **VR headset for gaming** compared to the total gaming population

+69%

Gen Z gamers are more likely to be interested in **Sandbox games** compared to the total gaming population

TREND 5

Sweet Caroline Sweet Catalog Sale!

Unpacking The
Valuation Behind Those
Big-Figure Music Deals

CATALOG VALUATION

What Makes Music Such An Attractive Investment?

1

Music royalties generate cash flow on the first day of ownership

2

Because royalties are a cash-flow generating asset, they can be leveraged by the owner to acquire more assets

3

New global opportunities arise as streaming expands into emerging markets

THE BIGGEST CATALOG DEALS TO DATE

EST. UP TO
\$600M

Bob Dylan (2021)

Est. \$500-600m through two separate deals with Universal Music Publishing and Sony Music for publishing and master recordings

EST.

\$500M

Bruce Springsteen (2021)

Est. \$500m through two deals with Sony Music for publishing and master recordings

Bruce Springsteen vs. Bob Dylan in 2022

Bruce Springsteen's week-over-week streaming shows the opportunities brought to investors with a new album release, while Bob Dylan's streaming demonstrates the consistency and predictability investors look for in a catalog, as it showed <1% in period change through 2022

Bruce Springsteen
Only the Strong Survive
Album Release 11/11/22

Additional Deal Points to Consider

In addition to streaming activity, investors are also paying attention to other factors like:

RIGHTS

- Future Recording Project Royalties
- Name, Image and Likeness
- Song Publishing

POTENTIAL FUTURE MARKETING TENTPOLES

- Brand Partnerships
- Sync Opportunities
- Biopic
- Biography / Autobiography
- Museum Exhibit

EFFECT OF INTEREST RATES

- Macroeconomic conditions are increasing interest rates after a period of lower interest, creating an environment where financing is now more expensive to secure than it has been in recent years. This change in rising interest rates will test investors in this space and there are likely to be fewer exorbitant offers

TREND 6

Global Outlook

Global Hit Score: What Is It?

A song's total global stream volume is one measure of popularity, but this single figure does not illustrate global reach. Luminate has calculated a song's Global Hit Score — a metric by which to measure a song's popularity by both streaming volume and geographic breadth. Luminate's Global Hit Score is a mix of 1) volume of streams 2) rank of the song in each country 3) and the streaming size of the country. The maximum possible score is 100, which would be achieved if a song was ranked #1 in every country. The higher the number, the more widespread the success of the song.

About Luminate

Luminate is the preeminent entertainment data and insights company, unleashing access to the most essential, objective, and trustworthy information across music, film and television, with data compiled from hundreds of verified sources. Today, the company maintains its more than 30-year legacy of accurate storytelling by powering the iconic Billboard music charts, while also acting as the premiere database for the television and film industries. Working closely with record labels, artists, studios, production companies, networks, tech companies, and more, Luminate offers the most valued source of comprehensive, independent, and foundational entertainment data that drives industry forward. Operating independently, Luminate receives investment and support from Penske Media Corporation and Eldridge. For more information, visit: luminatedata.com
